

TABCONF

The Atlanta Bitcoin Conference 2022

Builder Day October 12

Workshops October 13

Conference October 14 - 15

TABConf is The Atlanta Bitcoin Conference — an event for building communities, providing education, and supporting developers. We like to think of this as the most inclusive, organic, grassroots event possible for Bitcoin.

Why attend TABConf 2022?

Great Speakers

Talks and panels with some of the brightest minds in Bitcoin.

Capture the Bitcoin

This conference-wide scavenger hunt will test your knowledge of Bitcoin as you compete to be the first to steal real Bitcoin!

Workshops

Hands-on workshops that will teach you how to develop with the latest Bitcoin libraries and apps.

Builder Day

Meet the people who build your favorite open-source Bitcoin projects, and learn how to become a FOSS contributor yourself.

BitDevs Village

This village is geared towards those interested in discussing and participating in the research and development of Bitcoin and related protocols. A collaboration between 4 BitDevs communities: Austin, Miami, NYC, and Raleigh!

NextGen Village

NextGen Village is a fun interactive space for all ages! Come and go any time, play games, make art, and meet other Bitcoiner families. It takes a village to raise the next generation of sovereign individuals!

PlebDev Village

PlebDev Village is a place for misfit hacker types, the wizards on the spectrum, the everyday builders! PlebDev Village is a celebration of the limitless potential still untapped in Bitcoin and Lightning. Brought to you by PlebLab and Base58.

Gaming Village

Enter a next-generation arcade with a mix of mobile and PC gaming, all powered by Bitcoin. Experience Bitcoin gaming first hand, then stick around to discuss the implications of Bitcoin Lightning tech on the gaming industry and the virtual economies of the future!

Bitcoin development has never been more important and careers in this space have never been more sought after as they have been in 2022.

Open source projects and new Bitcoin companies are being created faster than ever before. As our community continues to build, we need to be prepared. So we're creating just that opportunity.

TABConf is the place for anyone to learn, grow, and build on Bitcoin. This year's speakers represent the best in core development, lightning, privacy, and beyond.

Speakers

Adam Jonas
Head of Special Projects

Zack Shapiro
Attorney, Investor, Advisor
Bitcoin Policy Inst. & Pleb Lab

...and many more that, quite frankly, won't fit on this page.

brink

[Brink](#) exists to strengthen the Bitcoin protocol and network through fundamental research and development, and to support the Bitcoin developer community through funding, education, and mentoring. TABConf 2022 will be donating a percentage of ticket sales and activities throughout the event to continue the efforts of Brink in mentoring new open source contributors to Bitcoin development. Learn more about Brink at brink.dev.
